## Basic Material Division

### ■ HICKORY

**HICKORY WOOD** is the most commonly-used material worldwide, that is suitable for the fabrication of drumsticks.

### ■ HORNBEAM

**HORNBEAM WOOD** is one of the hardest and most used materials for the fabrication of drumsticks.

# Manufacturing Process

## 1. MATERIAL

We only use the highest quality materials to manufacture Balbex drumsticks in two basic types: American hickory imported from the USA, and domestic hornbeam harvested in selected locations across Europe.

## 2. DRYING PROCESS

The strength of material we use must meet our high demands. The first requirement of achieving the appropriate product quality from the wood harvested is good drying of the timber.

## 3. TURNING PROCESS

Turning process is another essential step in manufacturing our drumsticks. We use specialized CNC machines developed specifically for drumstick turning.

## 4. FINISH

An original double layer finish is applied to the drumsticks after turning. The first layer solidifies the material whereas the second improves the grip to prevent slippage.

## 5. WEIGHING, PAIRING, STORAGE

Finalized drumsticks are stored under constant conditions with stable temperature and low air humidity to prevent moisture and potential deformation. We guarantee a consistent weight for each of the Premium Hickory models - the weight of each model will deviate by a maximum of +/- 2 grams.

# Premium Hickory

” Models manufactured from the best Premium Hickory available with an original double strengthening and slip resistant finish.

## Material

We only use the highest quality materials to manufacture Balbex drumsticks in two basic sorts: American hickory, imported from the US, and domestic hornbeam, harvested in selected locations across Europe. Both of these materials are provided by experienced suppliers who, after long-term cooperation, already know exactly what our products need for their high quality and above all a long service life.

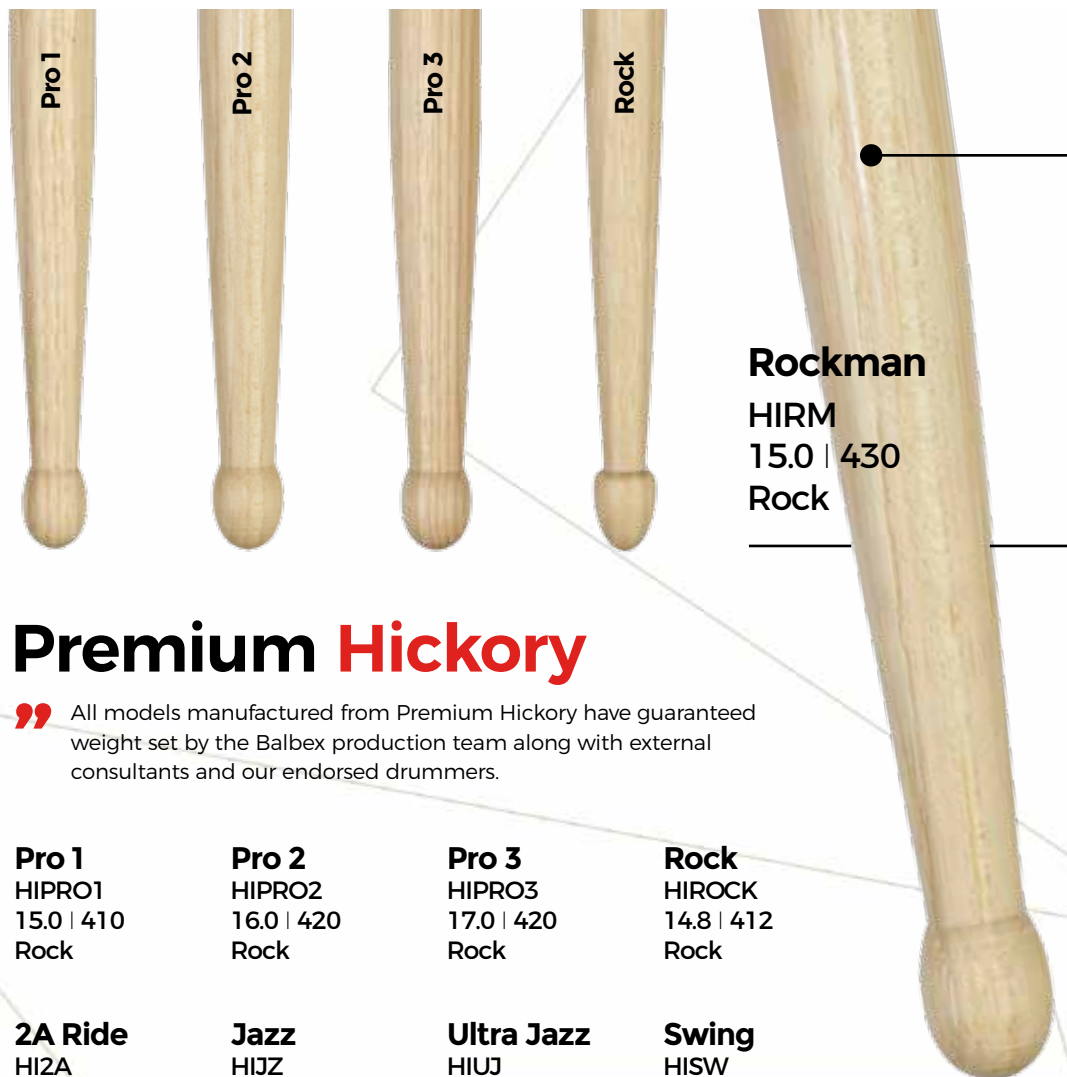

## American Hickory

is the most commonly-used material worldwide, that is suitable for the fabrication of drumsticks. It is acclaimed for its great hardness, toughness and durability.

# Surface Finishing

## Double surface finish

hardening and anti-slip layer

Our double surface finish is applied on most of our drumsticks. The first layer strengthens the material from which the drumsticks have been manufactured, and the second layer reduces the risk that the sticks will slip in your hands during playing.

## Good grip

roughened part in natural condition

Our drumsticks with the Good grip surface finishing feature a natural but roughened part where you hold the drumstick - so that they do not slip in your hands from the first moment you grip them. The upper drumstick part is provided with our dual treatment to harden the surface layer.

# Fantastick Hornbeam

” Fantastick hornbeam sticks are manufactured from unsorted hornbeam timber with a double strengthening and slip resistant finish.

**FANTASTICK HORNBEAM.** We sell these drumsticks in Economy packs of five pairs. European hornbeam has material properties similar to those of American Hickory, with the only difference being lower weight and slightly lower durability (by approximately 10 %). The best of the sorted hornbeam harvested in Europe is sold as our Fantastick product range.

# Fantastick Hickory

” Fantastick Hickory manufactured from unsorted hickory with double strengthening and slip resistant finish. We sell these drumsticks in Economy packs of five pairs.

**FANTASTICK HICKORY.** American Hickory is the world's most common drumstick material, favoured for its resilience, durability and rebound properties. Our drumsticks Fantastick - The economy hit were created as a reaction to drummers who demand cheaper drumsticks with Balbex double surface finishing. Fantastick are made of ungraded hickory where higher weight differences can appear.

# Fantastick

■ Hickory and  
■ hornbeam  
with double  
reinforcing and  
non-slip surface  
finishing.

Drumsticks are  
sold in Economy  
sets of 5 pairs.

**Fantastick** The Economy Hit products are our response to a popular demand for affordable drumsticks with double finish. **Fantastick** are manufactured from unsorted materials with a chance of weight differences and slight cross grain.

**Fantastick** are paired to the weight difference of  $\pm 2$  grams and sorted by resonance of the timber. Each pair comes in an original packaging we developed specifically for this purpose. Our packaging is patented under protected design No. 2010-38162.

# Fantastick Colour

” Fantastick White hickory with colour grip. Drumsticks are sold in Economy sets of 5 pairs.

## FANTASTICK COLOUR.

Balbex also produce Fantastick Colour drumsticks in Economy sets of five pairs. We make them in Black, Red, and White from hickory wood in the models 5A, G5A and G5B.

# Kai Hahto<sup>FIN</sup>

WHEN I DISCOVERED BALBEX FOR THE FIRST TIME, I WAS IMPRESSED ABOUT THE VARIETY OF MODELS AND THE QUALITY OF THE STICKS. THAT'S WHY I USE THEM AS I AM STILL IMPRESSED AND INSPIRED WHAT THEY DO AS A COMPANY!

## European Term

Balbex is a European brand. Since the establishment of the company in 1997, quality has been our priority. Quality in all manufacturing stages, starting with selection of the timber, processing, drying, turning, wide product range and reliable customer service.

Balbex drumsticks have become a favourite choice of drummers especially around Europe with over 500 sales points to this date. Thanks to their research and development, innovation and special manufacturing at CNC machines, Balbex has become one of the most progressive drumstick producers in Europe and is now ranked among the largest drumstick producers in the world.

” Balbex is a European brand. Since the establishment of the company in 1997, quality has been our priority.

**Balbex drumsticks are sold at sales points in** the Czech Republic, Germany, Finland, Sweden, the Netherlands, Belgium, Luxemburg, Poland, Greece, Belarus, the UK and Spain.
